RFJW03系列喷水织机，是一款适合轻薄及中等厚度织物织造的织机，借鉴日发其它喷水织机的开发经验，重新优化设计，使织机的织造速度和织造质量均有提升。该织机配置丰富，可以满足不同客户的织造需求，并且是一款高性价比的织机。

RFJW03 series water jet loom is suitable for weaving light and medium-thickness fabrics. Drawing on Rifa's experience in development of other water jet looms, the design is optimized, the weaving speed and quality of the loom are improved. The loom has varied configurations, it can meet the weaving needs of different customers and is a cost-effective loom.

**加强框架**

通过对原有框架机构改进,提高了整机的机架刚性。

**Reinforced frame**

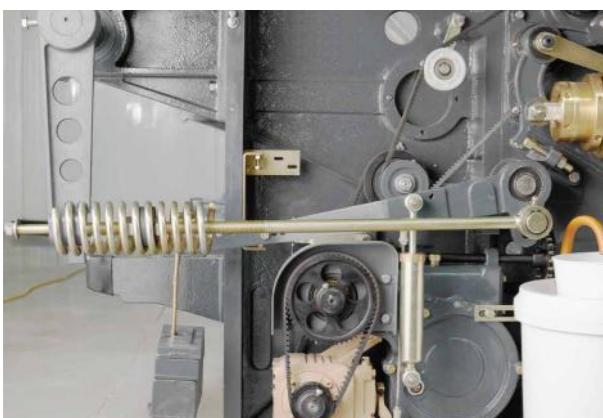

By improving the original frame mechanism, the frame rigidity of the whole machine is improved.

**精密水泵装置**

高精密的引纬装置,根据客户织造特点,合理配置引纬系统,使织机能够达到高速高效的织造需求。

**Precision water pump device**

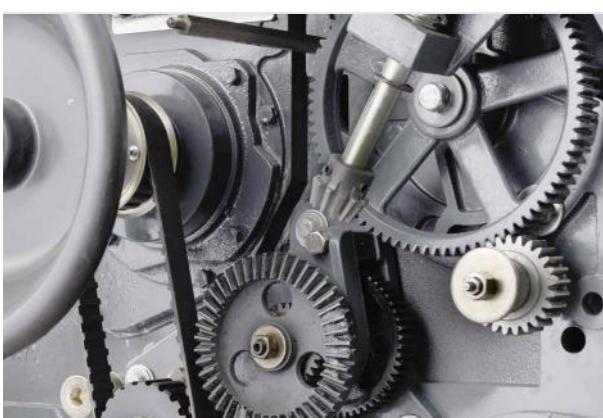

This high-precision weft insertion device, according to the weaving characteristics of customers, is equipped with a reasonable weft insertion system, so that the loom can meet the requirements of high-speed and efficient weaving.

**机械送经**

可以配置不同配重块,实现不同织物织造张力的需求。

**Mechanical let-off**

There are different clump weights for different configurations, the demands of different fabrics for weaving tension are met.

**机械卷取**

通过更换不同组合的纬密齿轮,能够实现不同纬密织物的织造,操作方便。

**Mechanical batching**

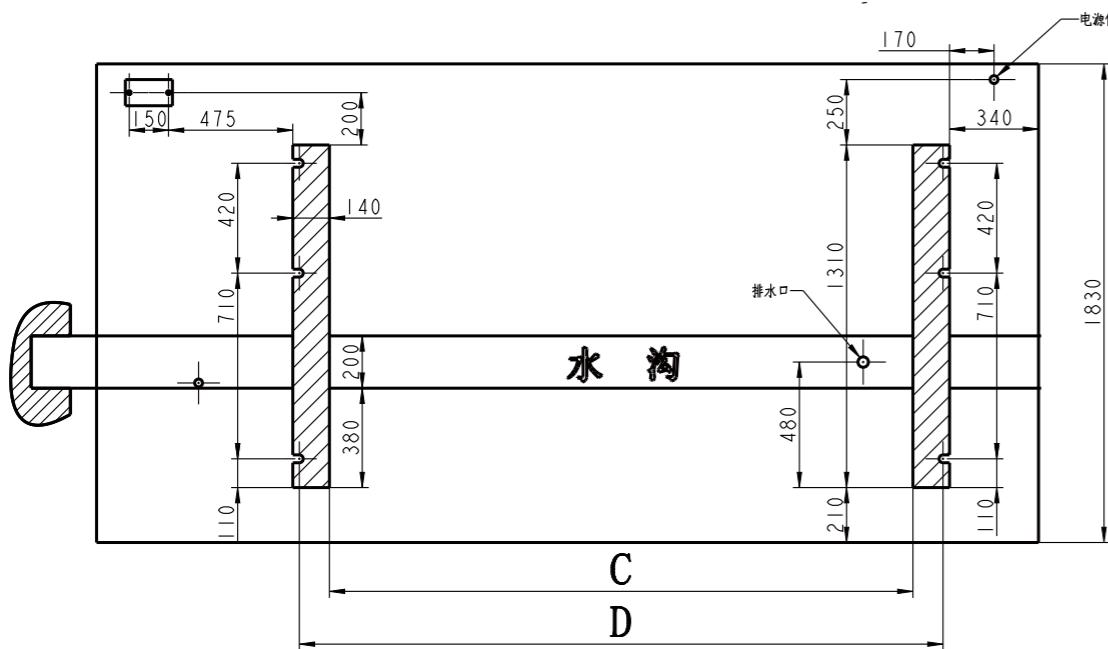

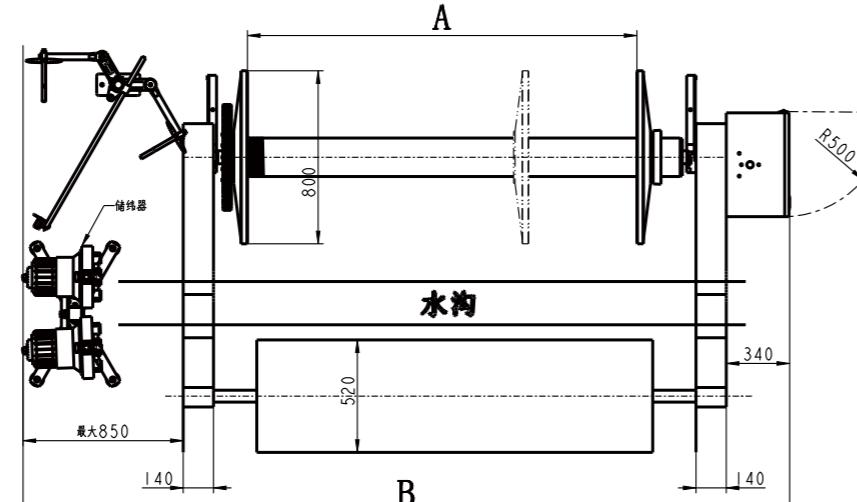

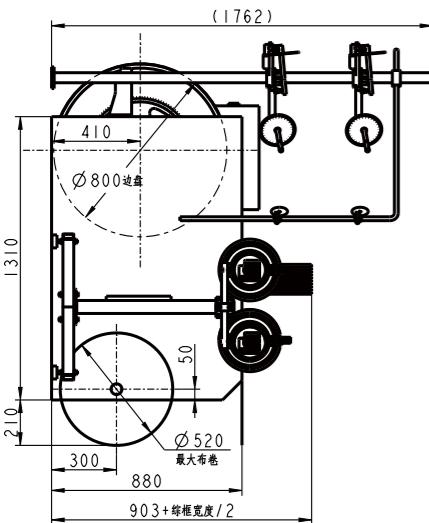

By changing to the weft density gears with different combinations, the weaving of the fabrics with different weft density can be achieved, the operation is convenient
